James F. Glenn
Scientific Director
Council for Tobacco Research, USA, Inc.
900 Third Avenue
New York, New York 10022

Dear Dr. Glenn:

The enclosed grant application was submitted to the University of California, Davis, Tobacco Research Grants Program. It was reviewed by one reviewer who perceived the proposal as excellent and, by another reviewer who perceived the proposal as not very innovative. The question of antioxidants and cigarette smoke exposure is an ever-more important issue now that answers concerning mechanism can be pursued with better technology.

We can now measure lipid hydroperoxides directly at concentrations of 10 µmoles.

Dr. Barry Halliwell was planning to use the project to fund his sabbatical over here. Is there any chance that we could interest your group in the proposal?

Sincerely,

Carroll E Cross

Carroll E. Cross, M.D.
Professor of Medicine & Physiology
Division of Pulmonary-Critical Care Medicine
